

National Severe Weather Warning Service

Chief Forecasters Assessment

A trough of low pressure will be slow moving over southwest Scotland on Saturday night bringing heavy and at times persistent rain. During Sunday a depression will develop with a strengthening southwesterly airflow enhancing the rainfall across high ground during the afternoon. The rain will ease by evening. Accumulations during the event are expected to be around 50 to 70mm, possibly higher over the Galloway hills.

The Met Office have issued an **Amber Warning of Rain**

Valid from **17:00 on Sat, 14th Nov 2015** until **18:00 on Sun, 15th Nov 2015**

Rain will be persistent and heavy at times on Saturday night. The rain is likely to ease for a time on Sunday morning before further heavy rain arrives on Sunday afternoon. The rain will be especially heavy over hills exposed to the strengthening southwesterly wind.

Be prepared for some disruption to travel due to flooding, either from surface water flooding or flooding from rivers which have remained high after recent heavy rainfall.
